NPIC/TDS-179/67

5 October 1967

MEMORANDUM FOR: Director, National Photographic Interpretation Center

THROUGH: Chief, Support Staff

SUBJECT: Request for Change-in-Scope Amounting to [redacted]
[redacted]
the Integrated Information Systems (IIS) Program
using FY-1968 R&D Funds

25X1A

1. This memorandum is a request for approval to enter into R&D contractual action using FY-1968 funds for a change-in-scope (amendment to the Contract) on the IIS Program.

2. NPIC has contracted twice with the [redacted] for the Integrated Information System. This was done first in FY-1966 for [redacted] again in FY-1967, a follow-on contract for [redacted] was signed to accomplish the second phase of a proposed four-phase effort aimed at updating and improving the NPIC computerized information processing system.

25X1A

25X1A

3. The IIS program is designed to improve the information processing within NPIC as recommended by the IG Survey of June 1965 and the Land Panel report of August 1965. In the first phase of the program an analysis of the NPIC information flow process was carried out and a conceptual design was generated and presented to NPIC Management. Subsequent to a review and modification of the conceptual design to insure compatibility with NPIC's responsibilities as assigned by the JIIRG, a contract was let with [redacted] for the second phase work. The system design and implementation plan is to be covered by the FY-1967 contract. Review of the sub task reports and also the final draft of the System Design report submitted by [redacted] to NPIC revealed that additional material would be needed to furnish NPIC with complete system design documentation. This new material was in addition to material originally envisaged as comprising the final system Design, i.e., a compilation of the fifteen sub task reports covering various facets of the proposed system. In addition, it was considered advisable to acquire macro-flow diagrams as a part of the software specifications.

4. The [redacted] has performed competently to date and it is anticipated that the additional effort required will also be performed successfully and satisfactorily.

25X1A
5. Upon completion of phase two and this change-in-scope, implementation of the design will require the acquisition of the system components, both hardware and software; installation of the components and accompanying system changes and finally checkout and test. [redacted] has been budgeted in FY-1968 for the system prototype components acquisition; [redacted] has been budgeted in FY-1969 for the system installation and test.

25X1A
6. The proposed action contained in this memorandum is considered to be an essential part of the IIS program and is to be considered as a new task and project for FY-1968; the funds required for this action will be taken from the planned FY-1968 funds for IIS.

25X1A
25X1A
7. It is requested that the change-in-scope for the Integrated Information System be approved for contract with [redacted] from FY-1968 R&D funds. It is recommended that the contractual action be a change-in-scope amendment to Task Order #17 [redacted] This action will be handled as a separate project under the R&D Program for the Center.
